

# HOAs

**If your neighborhood receives the City's Solid Waste Services provided by the Solid Waste Management Department (SWMD), you may request a presentation on recycling by one of our Recycling Coordinators.**

Simply fill out the online request at least one week prior to the event and we'll be in touch to coordinate the details. If your meeting is closer than one week out, you may call us at 210-207-6410 but please note that we may not have any availability.

We are busiest during the school year and our team does not make presentations on Sundays or holidays.

Our main focus would be on recycling but we can also answer questions about other SWMD services including our Organics program. We will always bring plenty of our Service Guides and sometimes even free bags of compost and other helpful items.

If you live in an apartment complex or multi-family housing that has private collection providers, we may still be able to attend your event. *For those types of meetings, please visit [www.reworkssa.org](http://www.reworkssa.org).*
